Hello,

You're correct about the RW-2 ID number. Thank you for your assistance!

Sincerely,  
Christina Hoppes  
Environmental Program Supervisor

I believe that the well id of RW-2 should be 55-234622 instead of 55-219994. I've updated our records. This change will be reflected in the confirmation notice when this well becomes active.

Thank you,

~~~~~

Judy Kerpel, USEPA Region 9

Subject: USEPA UIC notification regarding: AZ-20220301-JK-2489: Kyrene Water Reclamation Plant, Tempe, AZ, 85283

Total Wells: 3

1 - Active - 5R33 Aquifer Storage and Recovery - as of 03/01/2022

2 - Under Construction - 5R33 Aquifer Storage and Recovery - as of 03/01/2022

Thank you for submitting inventory data for the above-referenced facility with its injection ID. Below is a copy of data received. Please reply if the data was received or transcribed in error. This notice supersedes the one sent earlier today.

This notice authorizes the active discharge listed to inject uncontaminated water only. This notice also authorizes the two planned discharges listed; however, please update this registration when these wells are active to receive our authorization to inject uncontaminated water only.

Any change of use or ownership of the wells, or any new injection, requires notification to EPA. For more information, please see also the regulations beginning at 40 CFR 144.

Judy Kerpel  
US EPA Region 9
